Specified Agricultural Commodities: Unloads from All	
Sources, by Origin.....	1930

PREFACE

Statistics in this publication include bulk steamer, ocean barge, and plane unloads of most agricultural products from sources outside the State and from the outlying islands, as well as marketings from the Island of Oahu. Although direct imports made by the Armed Forces are excluded, quantities sold to commissary stores and sales to the Armed Forces by local dealers are included. Supplies of fresh fruits and vegetables from the State include quantities for fresh market as well as processing, and also outshipments from the State. Several items of minor importance are excluded and taro for poi manufacture is grouped with miscellaneous commodities. Marketings of poultry and fluid milk are from all farms; and marketings of beef and swine products are from total slaughter figures. Unload data on meats do not include meats in any processed form.

Explanation of Data in Summary Tables

Fruits and vegetables of minor importance were omitted in Table 1; the quantities given include only those commodities listed in Table 1, page 9. Data generally have been rounded to thousands of pounds, except for eggs and livestock. Dressed poultry data are on an eviscerated basis for easier comparison of quantities received from the several sources. Oahu slaughter of hogs includes animals imported from the U. S. Mainland as well as unloads from the outer islands; and therefore, does not signify that all hogs slaughtered originated on Oahu farms. Cattle and sheep slaughter include animals raised on the neighbor islands.

In the index charts, the year 1950 has been selected as a base because it was least affected by factors that would tend to distort the normal flow of supplies.

ACKNOWLEDGMENT

The Federal-State Market News work was made possible through the cooperation of the Consumer and Marketing Service, United States Department of Agriculture, and the Hawaii State Department of Agriculture. The Department of Agriculture gratefully acknowledges the assistance of all those who contributed information. Steamship, barge, and air transportation companies furnished the unload data; records of Oahu truck receipts were obtained from wholesalers.

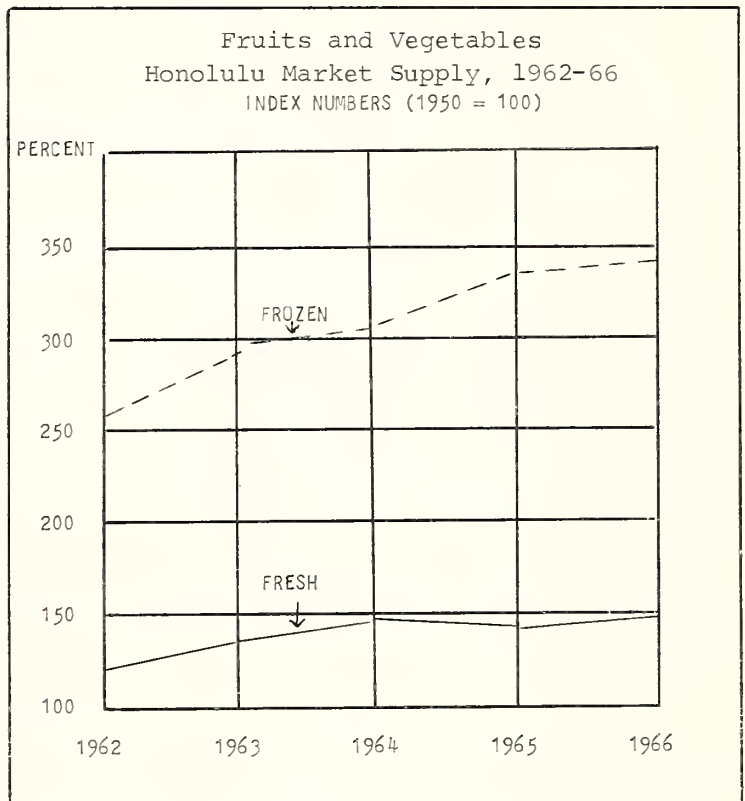

5-YEAR SUMMARY OF HONOLULU MARKET SUPPLIES

Fresh and Frozen Fruits and Vegetables

In 1966, the total supply of fresh fruits and vegetables in Honolulu markets was 132.8 million pounds, an increase of 4.1 million pounds or 3.2 percent over 1965. Foreign and mainland imports showed a decrease of 1.3 million pounds from a year ago. However, to meet the Honolulu market requirements, both Oahu and neighbor islands more than made up the decline in out of state supplies by increasing their marketings by 5.4 million pounds. Nevertheless, of the total marketings of fresh fruits and vegetables, supplies from the mainland led with 70.6 million pounds; neighbor island farmers contributed 39.6 million pounds; Oahu's producers marketed slightly over 21.2 million pounds; and foreign sources 1.4 million pounds.

Because of continued urbanization on Oahu, vegetable production on Oahu has not kept pace with neighbor island production. During the five-year period, contributions of outlying island farmers to the total supply in the Honolulu markets have been far greater than those of Oahu's farmers. In 1966, a percentage breakdown shows that neighbor islands supplied 29.8 percent of the total

supply, whereas, only 16 percent originated from the island of Oahu.

Inshipments of frozen fruits and vegetables have increased steadily over the five-year period. Last year, imports increased 31 thousand pounds and were .8 percent greater than in 1965. All of the 4.1 million pounds of frozen fruit and vegetable products received on the market were from the U. S. Mainland.

Selected Dairy Products and Oleomargarine

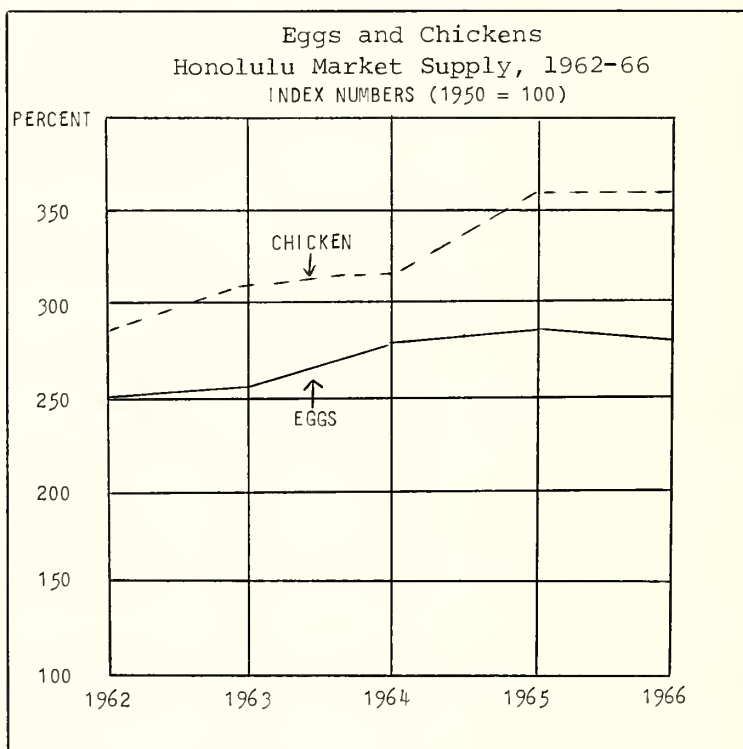

The volume of Oahu milk production decreased slightly in 1966. Fresh milk production amounted to 128.0 million pounds, a decrease of 700 thousand pounds from 1965. However, 1966 production was 10.9 million pounds above the average for the 1962-66 period.

Imports of butter declined 96 thousand pounds or 2.8 percent from 1965, continuing the downward trend which began in 1964. Cheese imports declined for the first time in recent years, showing a slight decrease of 52 thousand pounds or 1.9 percent from 1965. The increase of oleomargarine imports was a substantial one, 657 thousand pounds or 22.3 percent over 1965. For the first time in recent years, oleomargarine imports exceeded butter imports. Oleomargarine receipts in 1966 totaled 3.6 million pounds, nearly 300 thousand pounds more than butter imports.

Poultry Products

Eggs: The total volume of eggs marketed in 1966 was 437.1 thousand cases, a decrease from 1965 of 5 thousand cases. Both imports and state marketings contributed to the decrease.

The state poultrymen supplied approximately 408.1 thousand cases of eggs. This represented 93 percent of the Honolulu marketings in 1966. Of the 437.1 thousand cases received by the Honolulu market from various sources, 81.6 percent were from Oahu; 11.7 percent came from neighbor islands; and 6.6 percent were imported from the U. S. Mainland.

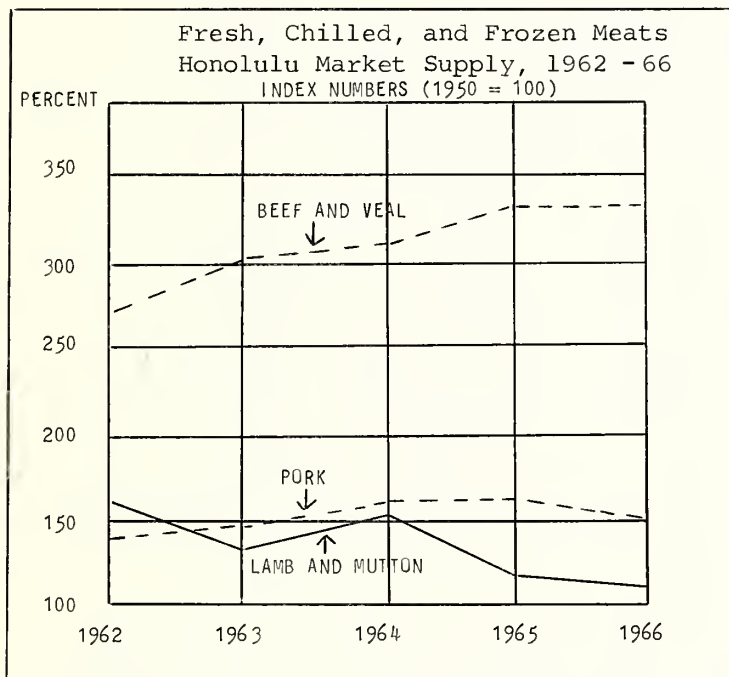

For the second successive year, Honolulu supply of eggs from the outer island poultrymen has decreased. In 1966, a decrease from 1965 of 11.2 thousand cases or 18 percent was recorded. The Oahu poultrymen increased their production by 10.9 thousand cases or 3.2 percent over 1965. There has been no record of importation of eggs from foreign countries since 1962.

Poultry Meats: Poultry meats marketed in Honolulu in 1966 amounted to 12.7 million pounds, only 15 thousand pounds more than in 1965. The state poultrymen have not kept pace with the increase in the total supply. In 1966, nearly 9 million pounds of poultry meats were imported from the U. S. Mainland and only 3.8 million pounds was produced locally. Inshipments from the mainland consisted of 70 percent of the total volume. The remaining 30 percent was from state producers.

During the five-year period of 1962 to 1966, imports continued to show a steady growth coinciding with the population increase. Island poultry marketings were inconsistent. Last year's state supply from local sources was the lowest recorded during the five-year period.

Red Meats

A total of 69.7 million pounds of fresh, chilled and frozen red meats were marketed in Honolulu in 1966. This represented a decrease of 1.7 million pounds or approximately 2.3 percent less than 1965. Beef and veal marketings increased slightly over 1965 but was not enough to offset the decrease in marketings of pork, lamb and mutton. Beef and veal made up 74.8 percent of the total volume of red meats; pork, 24.0 percent; and lamb and mutton, 1.2 percent.

Beef and Veal: The Honolulu market supply of beef and veal increased slightly in 1966, continuing the upward trend of the past few years. Imports of beef and veal from the U. S. Mainland and foreign countries declined 3.3 million pounds, mostly from foreign countries where imports declined 3.0 million pounds or 15.6 percent below 1965. State producers increased their marketings by more than 3.3 million pounds, an increase of 19.7 percent over 1965 to offset the decline in imports.

Pork: The Honolulu market supply of pork amounted to 16.7 million pounds in 1966, a decrease of 1.6 million pounds or 8.9 percent from 1965. Both imports and state produced pork showed decreases. Imports of pork totaled 10.1 million pounds, a decrease of 1.2 million pounds or 10.7 percent from 1965, while state hog raisers marketed 6.6 million pounds in 1966, a decrease of 404 thousand pounds or 5.8 percent from 1965.

Lamb and Mutton: Lamb and mutton marketings in 1966 totaled 839,000 pounds representing a 6.4 percent decrease from 1965. All of the lamb and mutton in the Honolulu market were of out of state origin.
